

CherrySwap

the automatic market-making protocol based on OKExChain

Introduction

CherrySwap, which is the automatic market-making protocol based on OKExChain, and it is used for earning the token of CHE. The platform adopts the mechanism of automatic market maker ("AMM"), allowing token trading on OKExChain. In addition, you can earn CHE via Yield Farm and transactions, and more tokens via Cherry pool. And you can subscribe for new tokens through IFO, etc.
